

Meeting: 3**31/05/2021****Third Meeting****Agenda:**

- Where the project is at (This week's accomplishments)
- Next week's goals
- Presentation for kelvin

Project Report

Continued construction of 'rough' literature review, consistent of reading around uncertainty, weather predictions, spatial trajectories, and probabilistic forecasts. Highlighted papers included **'Non-expert interpretations of hurricane forecast uncertainty visualizations'** a very similar brief to this dissertation, touches upon visualisation.

- This week
 - What I aimed for
 - Literature review
 - Reading on uncertainty
 - Deeper reading upon hurricanes and human's uncertainty relation
 - Consolidation of notes already taken.
 - What I did
 - Reading
 - Uncertainty in the broad sense
 - What is it, how does it differ from error, precision, and accuracy?
 - How does the public understand uncertainty?
 - What are the main uncertainty aspects of a hurricane?
 - Initial writing on
 - Uncertainty – 1 page rough
 - 2 pages notes
- Next week
 - Aims
 - Consolidate uncertainty and write up to rough
 - Reading around visualisation techniques
 - Prepare presentation to kelvin
 - What have I done/learnt
 - What are my next steps
 - Question for rms
